

## Policy Title: Liability Insurance

---

### **Policy**

All nursing students, except nurse anesthesia and students on active duty in the military, enrolled in nursing courses will be required to participate in The University of Texas Health Science Center at Houston Liability Insurance Plan regardless of other coverage the student may have. At the time of registration, each student except those mentioned above will be assessed an automatic charge for insurance coverage for the entire academic year. The charge will vary, dependent on the student's status. Typically, the rates for nurse practitioner and doctoral students will be higher than those for other students. Graduate students who are members of the U.S. Armed Forces on active military duty have professional liability through their branch of service. Nurse Anesthesia students receive liability insurance through AANA. Students who enroll mid year will be charged a prorated amount. Liability insurance fees are non-refundable and are subject to change.

This liability insurance coverage is applicable only when the student is functioning in the student role.
